TECHNICAL SKILLS

Python, SQL | Databricks, Azure, AWS (S3) | DataRobot, Power BI, PySpark | Git, Relational Databases

PROFESSIONAL EXPERIENCE

Takeda | Cambridge, MA May 2022 – July 2026

AI Portfolio Lead, Foundational Technology Platforms June 2025 – July 2026

- Led AI portfolio across four platform pillars (networking, infrastructure, data, support), encompassing 20+ enterprise applications including Databricks
- Partnered with platform leadership to drive portfolio prioritization and strategic alignment, accelerating enterprise execution
- Unified demand management across teams, improving prioritization and mitigating risk across high-impact initiatives
- Established governance processes resulting in zero major production incidents

AI Transformation Product Owner, Databricks May 2022 – June 2025

- Led enterprise data and AI platform strategy across 8 business units, supporting 2,600+ MAU, and leading a 20-person cross-functional transformation team
- Drove platform adoption and value realization, expanding investment from \$17.5M to \$30M+
- Directed migration to Databricks Enterprise 2.0, enabling scalable AI/ML use cases
- Delivered \$4M annual cost savings by optimizing cloud storage (AWS S3), eliminating 3PB of unused data
- Reduced migration costs by ~\$1.2M and accelerated delivery timelines through workflow redesign and automation
- Influenced stakeholders across a 200+ person organization spanning R&D and commercial

Humana | Boston, MA December 2019 – May 2022

Data Scientist, Cognitive/Machine Learning

- Developed ML models (neural networks, regression) using Python (scikit-learn, pandas) and DataRobot, leveraging 600+ features to identify high-risk members and improve NPS and STAR ratings
- Simulated benefit design changes to inform pricing and bid strategy
- Built analytics solutions in Power BI to map prescription journeys and drive actionable stakeholder insights
- Modeled drivers of avoidable medical costs using PySpark on 75K+ members, enabling targeted interventions
- Led and mentored three graduate interns, supporting development and execution of data science initiatives

par8o | Boston, MA January 2018 – October 2018

Product Manager, Integrations

- Led product development and integrations across EMR systems (Epic, Cerner, athenahealth)
- Defined requirements and prioritized features across engineering and QA teams

Azara Healthcare | Burlington, MA October 2016 – January 2018

Implementation Specialist

- Implemented population health analytics platform by integrating EHR data (Epic, NextGen, eCW), enabling improved reporting and data-driven clinical decision-making

Beth Israel Deaconess Medical Center | Needham, MA September 2014 – October 2016

Data Analyst, Care Coordination Strategy

Accenture | Boston, MA August 2012 – July 2014

Senior Analyst, Technology Consulting

EDUCATION

Boston University, Bachelor of Science in Electrical Engineering

Harvard Extension School, Graduate Coursework in Data Science

Massachusetts Institute of Technology, Graduate Coursework in Healthcare Entrepreneurship

PROJECTS AND ACTIVITIES

MIT Hacking Medicine | AthenaHealth Hackathon Winner | General Assembly (Product Management, Data Science)
